

# Habitats

## **Lesson objectives:**

- To assess your understanding of different habitats
- To outline how a range of organisms are adapted to specific habitats

# Comparing Habitats

L4: Identify some differences between habitats.

■ Desert

■ Temperate Forest

# Simple Adaptations

L4: Describe simple adaptations.

## ■ Polar Bear

## ■ Camel

## **Level 5 Activity**

L5: Explain why different organisms are found in different habitats e.g. because of the differences in environmental factors such as the availability of water.

# The Importance of Adaptations

L6: Identify and explain some adaptations an organism has and how these give it an advantage in its preferred habitat.

## The Shark

Adaptation	Advantage Provided

# Changes in a Habitat

L7: Can explain how and why changes in a habitat affect specific animals and plants.

■ Changing Habitats
▶

# Unusual Adaptations

L7+ (Extension): Can relate your understanding of adaptation to unusual examples, inferring or suggesting adaptations.

## ■ Rocky Seashore

## ■ Tropical Rainforest
